# Zaptec Go

---

## works with any car

---

No matter what you drive or where you're going, Zaptec Go is the surest way to power your journey. Built on leading edge Norwegian green tech, we've created the world's smallest 22 kW (that's max power) charger, that's as smart on the inside as it is simple on the outside.

## 1 Connect your charging station to the Zaptec App

You need to connect the new charging station to the Zaptec App to monitor your charging station, enable smart functions and manage your Zaptec Go+ subscription.

Scan the QR code located on the front of the charging station to start.

---

## 2

### Start / Stop charging

**To start charging** - Connect your charging cable to the vehicle and then connect the charging cable to the charging station. The car is charging when the status light changes to pulsating blue.

**To stop charging** - Please unlock and disconnect the charging cable from the car before disconnecting the cable from the charging station. The charging cable remains locked at the charging station until the charging process is finished or stopped by the car.

## Important information

Before using or maintaining this product, it is important to read the following safety instructions. Failure to follow and apply all the instructions and procedures covered in this quick guide will invalidate the warranty and cause Zaptec Charger AS and direct partners to waive all liability and claims for compensation.

### WARNING!

- ! Read the instructions carefully and familiarize yourself with the products before installing or using the products.
- ! This product must only be installed, serviced, and repaired by qualified personnel. A Zaptec certified partner shall carry out the handling of defect products under warranty.
- ! All applicable local laws and regulations must be followed during the installation and/or service of the product.
- ! Do not install or use a product which is damaged in any way.
- ! Only use appropriate and certified installation materials for the installation.
- ! Do not insert foreign objects in the products outlets during voltage and insulation tests as well as after the installation has been carried out. Measurements to be performed according to the installation instructions for the product.
- ! Do not use high-pressure washer equipment on the products.
- ! Avoid installing the products in locations exposed to high temperatures.
- ! EVSE adapter is possible to use with the product; however, usage must comply with local laws and regulations and resides outside the product specification and warranty.
- ! Charging cable extensions are not allowed to be used with this product.
